

PAVIT AGRAWAL

+91 9560075025 | pavitagrawal@gmail.com | [Github Profile](#) | [LinkedIn](#)

Aspiring Software Engineer with hands-on experience in C++, Java, and Python, strong fundamentals in Data Structures & Algorithms, Operating Systems, and SDLC – from coding and testing to deployment – built through internships, hackathons, and production-style full-stack projects.

PROFESSIONAL EXPERIENCE

Data Analyst Intern | May 2025 – Jul 2025

TransOrg Analytics | Gurugram, India

- Assisted in integrating ML-driven fraud detection into production systems, contributing to a deep-learning-based fraud engine.
- Analyzed product-level sales factors and margin impact for retail discount optimization initiatives.
- Completed in-house training covering SQL, Python, Tableau, Power BI, and core statistics.

Control Assurance Intern | May 2026 – Jul 2026

Deloitte, Audit & Assurance | Gurugram, India

- Assessed DPDP Act compliance for client KOBELCO and verified cybersecurity password/config controls for another client, recommending remediation measures.

EDUCATION

B.Tech, Computer & Communication Engineering

Manipal Institute of Technology

Jul 2023 – May 2027

Higher Secondary (Science, PCM)

Delhi Public School, Indirapuram

Mar 2023

STRENGTHS

Problem Solver, Fast Learner, Team Collaborator, Analytical Thinker, Self-Driven

SKILLS

Languages: C++, Java, Python

CS Fundamentals: DSA, Operating Systems, Computer Networks, Discrete Math, Linear Algebra, Calculus

Software Engineering: SDLC, Object-Oriented Programming, Software Testing & Debugging, REST API Development, Git

Databases: SQL, PL/SQL, MySQL

Cloud & Web: AWS, FastAPI, Node.js/Express, PHP, HTML/CSS, JavaScript

Analytics & BI: Power BI, Dashboards, Data Visualization, EDA

Machine Learning: NLP, Deep Learning, Statistical & Predictive Modeling, Generative AI, Agentic AI, AI Algorithms, AI Modeling, Prompt Engineering

Risk & Compliance: DPDP Act, Policy Risk Assessment, Cybersecurity Controls, Audit & Assurance

TRAINING PROGRAMS

- Industrial Data Science Internship, IIT Guwahati – 1stop.ai: ML and statistical modeling across healthcare, finance, and social datasets.
- In-house Data Science Training, TransOrg Analytics.
- Data Vista 2024: Generative AI, RAG, and Power BI workshops.
- Completed AWS Cloud Practitioner (CLF-C02) preparation course (Udemy)

Soft Skills Enhancement: Communication, Teamwork, Presentation.

PROJECTS

Civitas: Multimodal Civic Incident Intelligence Platform (Team Project)

- Built a multimodal civic incident intelligence platform (Python, FastAPI, Next.js, TypeScript, LangGraph, PostgreSQL/PostGIS) turning citizen reports (images, video, text, GPS) into verified, prioritized, and accountable municipal work orders.

Link: [Github](#)

Daedalus: AI Career Navigator (Team Project)

- Built backend services (FastAPI, Pydantic, SQLAlchemy) delivering deterministic career-fit scoring, skill-gap analysis, and recommendation APIs for an AI career-navigation platform.

Link: [Live Link](#)

Mnemos: Industrial AI Knowledge Intelligence Platform (ET AI Hackathon 2.0) (Team Project)

- Built an agentic AI backend (Python, FastAPI, LangGraph) for industrial asset intelligence using multi-agent orchestration, Hybrid GraphRAG (Vector + Graph + Structured Retrieval), and MCP-based tool integration to deliver evidence-grounded Root Cause Analysis (RCA), compliance validation, and asset insights with human approval workflows.

Link: [Live Link](#)

A-DAP-T: AI-Agent Safety Scanner (Team Project)

- Built backend APIs (Python, FastAPI) for a deployment-safety scanner detecting prompt-injection risk, exposed secrets, and unsafe tool permissions in AI-agent projects.

Link: [Live Link](#)

Bharat Finance Platform (AWS ImpactX Hackathon, IIT Bombay Techfest 2025)

- Developed a Next.js 15 + React 19 frontend with multilingual support and real-time visualizations, deployed as a scalable, production-ready FinTech UI on AWS.

Link: [Live Link](#)

Shodhak: Adventure Travel Platform (Team Project)

- Built the AI itinerary-planning feature (Gemini 2.5 Flash) for a full-stack travel discovery and booking platform, generating personalised, constraint-based trip plans with fallback logic.

Link: [Live Link](#)

AI Speech Persona Builder (Personal Project)

- Built an AI speech-coaching platform using FastAPI, Next.js, and the Gemini API to analyze speech and deliver personalized feedback via a scalable backend and typed frontend.

Link: [Github](#)

Hydro-DTM System (National Geo AI Hackathon, IIT Bombay Techfest 2025)

- Built an end-to-end Python pipeline fusing ML with GIS/LiDAR data to generate high-accuracy digital terrain models, achieving 95%+ classification and 90% predictive accuracy, a standout entry at a national IIT Bombay hackathon.
